

# iBOLT for SAP® R/3®

iBOLT supports all editions of SAP including R/3 4.6c and prior, up to and including ECC6.

**Delivering Simple and Cost-Effective Integration.**

**“ iBOLT for SAP ERP R/3 proved to be the best option to link our business operations in one easy-to-use, single utility tool, which we can continue to scale up as our organization grows. ”**

**Carney Vensel, Director  
International IT, LORD Corporation**

**Maximize the return on your existing IT investments.**

“ *With the speedy and top-notch support provided by Magic Software to both the Japanese and European offices, the (SAP R/3 integration) project advanced unexpectedly smoothly.* ”

*Manabu Usami, Senior Manager CIS Dept.  
Anritsu Corporation*

## Typical use scenarios

- Website integration
- Workflow
- Business process monitoring

- Enhanced productivity
- Create agility and flexibility to changing business needs
- Improved time-to-market
- View the full business picture. Make more informed business decisions
- Automate workflows and manual processes & reduce instances of human error
- Better management of customer information
- Lower project risk
- Lower budget requirement
- Out-of-the box management of data exchange

## Achieve your full IT potential

In a business world where cost of ownership and speed of delivery mean everything, Magic Software brings you a special edition of its award-winning business integration suite for the SAP R/3 environment.

More than ever, organizations today realize the need to squeeze more value from their existing IT investments. And they recognize in integration a surefire way of unlocking that potential. But unless integration is achieved quickly and cost-effectively, the potential value is lost.

For SAP R/3 users, fast, cost-effective integration is now a practical reality. iBOLT is Magic Software's industry-proven business integration solution, specially designed to achieve successful IT application integration that's **on-budget and on-time**.

## How does iBOLT create value?

Featuring a graphical, wizards-based approach, iBOLT eliminates the need to write complex code and significantly shortens your project costs and time to market. iBOLT helps organizations achieve their business goals rapidly and more cost-effectively by building automated business processes that share information across departmental and IT system boundaries.

**iBOLT works natively with SAP R/3** and once connected, gives you a host of **ready-made connectors** that hook up to a wide selection of the world's leading ERP, CRM, eProcurement, web and wireless applications such as: SAP Business One, Salesforce.com, Lotus Notes, Oracle JD Edwards, IBM i, and many more.

With integration, management gain a fuller view of their overall business, planners can better prepare for the future, and sales staff can leverage previously unavailable account information to improve their sales. Human errors are reduced along with manpower wastage as information no longer needs to be manually and repetitively re-keyed from screen to screen. Once integrated, information within your separate business applications flows exactly to where it's most needed and is updated in real-time.

# iBOLT for SAP R/3

## Delivering Simple and Cost-Effective Integration

### Fast and cost-effective integration – even for legacy SAP R/3 versions

While alternative integration solutions tend to work on a point-to-point basis that's associated with high expense and time consumption, iBOLT for SAP R/3 offers a proven platform that's agile and ideal for the needs of every tactical integration requirement.

With iBOLT you can extend SAP connectivity using SAP's native RFC API Library, while providing interfaces to RFCs, BAPIs and IDOCs. iBOLT for SAP R/3 also efficiently utilizes the newest SAP NetWeaver XI integration tools.

Even if you're still using an older version of SAP R/3, you can integrate it with a host of IT systems and benefit from a service-enabled SAP landscape. And because iBOLT is code-free and features a user-friendly, model-driven approach, you can easily adapt the integration as your plans and needs grow. No matter what version of SAP R/3 you use, you can remain competitive and maximize the value from your existing IT investments.

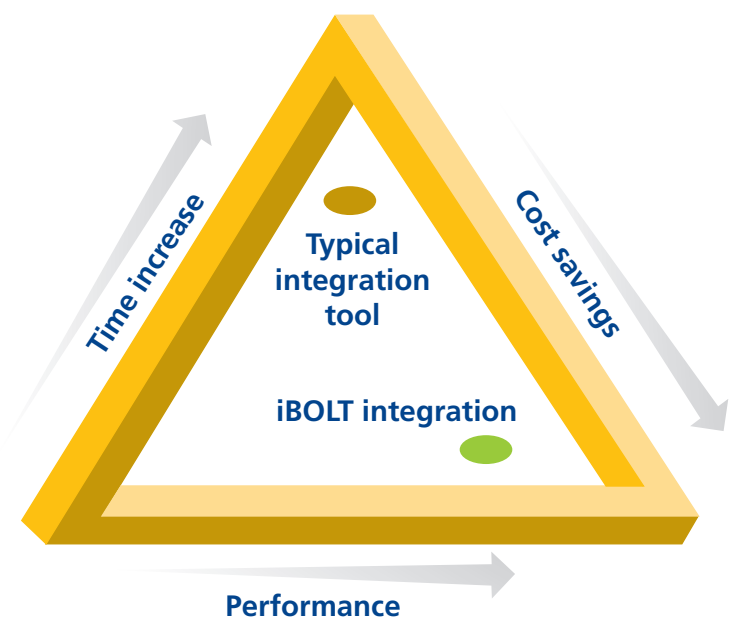

### SAP certified and ready to use

**iBOLT for SAP R/3 is fully SAP certified.** Since 2005 SAP has been working with Magic Software to produce a powerful combination of abilities that sets new standards of excellence for both the current and future needs of all SAP users.

- In 2008, Magic Software was awarded the "SAP Business One Global Solution Partner Award for **Leadership in Innovation**"
- In 2007, Magic Software received the "**ISV Partner Quality Excellence Award**"
- In 2006 Magic Software received the "**Solution Partner Leadership in Innovation Award**"

### With iBOLT for SAP R/3 you can now:

- Distribute SAP R/3 delivery notes and invoices - and automate manual communication with trading partners
- Update SAP R/3 products list - even when connecting existing e-Commerce sites to SAP R/3
- Transfer a third party purchase order to an SAP R/3 sales order - enabling customers/trading partners to submit orders automatically
- Expose and exchange any SAP R/3 data needed to facilitate EDI transactions
- Share SAP R/3 data across systems and combine processes
- Exchange SAP R/3 customer lists - and synchronize company data across multiple sites

**With iBOLT you achieve high performance in low-time and low-cost**

# iBOLT

## Why is integration easier with iBOLT?

- **No complex code** writing necessary
- **No dedicated hardware** required
- **Large library** of pre-built components
- **Drag & drop functionality** for easy configuration of your business processes
- **Visual data mapper** transforms information regardless of format
- **Step-by-step wizards** simplify complex integration
- **Open architecture** lets you connect to every DB, platform, file format etc
- **Intuitive** graphical user interface
- **Powerful**, built-in security and encryption tools
- **Online** monitoring capability
- **Automated** handling of exceptions and errors in business processes
- **Easily scalable** from departmental collaboration to company and enterprise workflows
- **Encryption & security** capabilities extend to both data and business processes
- **Out-of-the-box SOA** for any organizational scale
- **Optimized** connectors for SAP, Salesforce.com, Lotus Notes, IBM i and others
- **Certified and Gold SAP Software Solution Partner**
