

iBOLT™ Inter-Company Data Synchronization Accelerator for SAP Business One

Your customer's need

SAP Business One is often implemented across multiple company locations and a range of databases. By synchronizing the data between these databases and locations, your clients can benefit from a host of business advantages, such as accurate product inventory and pricing data, fewer order processing errors, less invoice adjustments and product returns, and ultimately, greater business profitability.

Your challenge

Successfully planning and completing an inter-company data synchronization project requires a considerable investment in time and resources to properly design, develop and test your project.

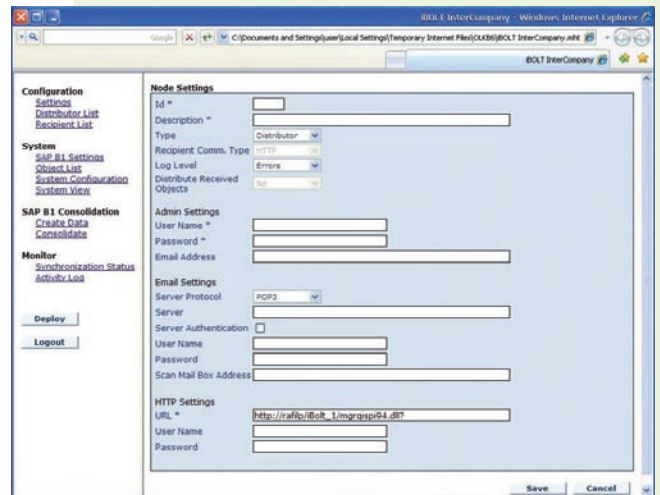

That's where Magic Software can help with its iBOLT Inter-Company Data Synchronization Accelerator.

The power of a ready made, out-of-the-box solution

The **iBOLT™ Inter-Company Data Synchronization Accelerator** is a code-free, out-of-the-box solution from Magic Software that allows you to quickly and simply extend the capabilities of SAP Business One.

Based upon a configurable, reusable template, the iBOLT Inter-Company Data Synchronization Accelerator provides all the business logic and administration and monitoring layers needed to deliver a full-proof solution to your clients. Now you no longer need to perform development, testing and deployment cycles - all you need is to fine-tune the solution to the needs of your specific customer.

With iBOLT's Inter-Company Data Synchronization Accelerator you can now quickly and easily implement inter-company data synchronization and deliver full database and branch office integration to all your clients, company-wide, cost-effectively, and on-time.

How it works

An extension of iBOLT for SAP's award-winning business integration platform, the iBOLT Inter-Company Data Synchronization Accelerator consists of four layers:

Business logic controls:

- Data capturing
- Data manipulation
- Data insertion

Communication runs the data transformation via a choice of:

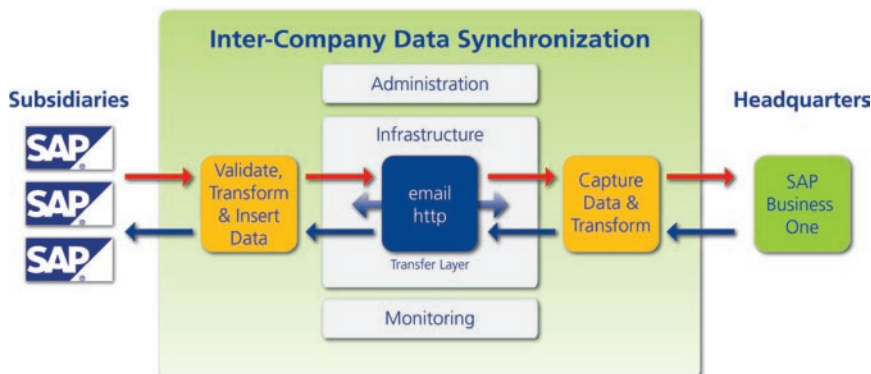

- Internet connection
- Email

Administration enables you to:

- Create and configure business logic workflows
- Centrally manage remote databases and branch offices

Monitoring provides real-time update of:

- Synchronization status
- Activity log

iBOLT Inter-Company Data Synchronization Accelerator's Architecture in a Typical Business Scenario

iBOLT™ Inter-Company Data Synchronization Accelerator for SAP Business One

Features

- Out-of-the-box business logic, administration, communication and monitoring
- Automatic data capturing, transformation, and insertion
- HTTP and email based data transfer communication across remote sites
- Point-and-click installation wizard
- Multiple business object support
- GUI based, easy-to-configure administration
- Real-time, web-based monitoring console
- Centralized management of remote databases

Benefits

- Instantaneous & cost-effective synchronization
- No need to write code or programming
- No need to map business workflows or parameters
- No need for lengthy development, testing or implementation
- Full data consistency, company-wide
- Adaptable and customizable for specific & future needs
- Keep resources focused on core initiatives
- Create a more agile and responsive organization
- Rapid return on investment
- Short learning curve
- Fully secure
